TRACKER

UNCOMPROMISING STYLE & VERSATILITY FOR OUTDOOR ACTIVITIES. TRACKER OFFERS A UNIQUE COMBINATION OF INNOVATIVE DESIGN & HIGH FLEXIBILITY.

A unique frame in many ways, unprecedented in its function, design and flexibility. Tracker is suited for many extreme outdoor sports, but works equally well in the city or while sitting at an outdoor café. Can be used as full or half frame, through the removable and replaceable part of the front so called "Jaw bone".

TRACKER 9020 // 100% UVA and UVB protection // Unbreakable Polycarbonate lenses // The frame is made of Grilamid (TR90) that provide high flexibility and low weight // One extra pair of contrast lenses // One extra spare rim // Adjustable friction rubber nose pad // Adjustable temple tips in rubber wire core // 20mm strap // Hard protective case with pockets for extra lenses // Cleaning cloth // Complies with European standard EN ISO 12312-1:2013

JAW BONE TECHNOLOGY & SIDE SHIELD

Change both appearance and functionality of the glasses with the supplied jaw bone.

WITH EXTRA LENSES & WITHOUT JAW BONE

Change the lenses according to the weather condition. Using the correct lenses increases the visibility significantly.

ATTACHABLE STRAP

Make sure that your glasses stays in place with the adjustable neck strap that is included.

ADJUSTABLE NOSE PAD AND TEMPLES

Customize your glasses for best fit. Adjustable temples and nose pad for best comfort.
